vintner portable

product overview

introduction

Vintner Portable has been designed to specifically facilitate the needs of Sales Executives on the move, providing easy access to sales information, stock availability, customers, prospects, prices, competitors and all other information necessary to complete a successful sales strategy.

Linking to Vintner Enterprise, it is a sales driven, tailored version of the main office system. Data is synchronised quickly and easily via either internet or office LAN whenever required.

Although designed for the new generation of lightweight Netbooks, it remains fully functional on a standard laptop.

key functionality

- Take sales orders
- View availability of stock
- Record samples and P.O.S
- Plan visits and record outcome
- Record competitor's products and prices
- View sales information and analysis
- Create proposed wine lists with customer bin numbers, prices and tasting notes
- Set up special prices and submit to Vintner Enterprise for management approval
- View, Print or Email reports
- Synchronise data with Vintner Enterprise over the internet or a LAN
